Title: ApplTop Solutions announce the worldwide release of ASL*Accelerate/R2i.

Summary

ApplTop Solutions announced this week the release of their next major product for the Oracle E-Business Suite, ASL*Accelerate/R2i. Initially designed over 4 years ago and over 12 months in development, the wait is now over.

Main Text

APPLTOP SOLUTIONS LIMITED
21st July 2003

Originally developed early in 1999 as a proof of concept product, ApplTop Solutions are pleased to announce the worldwide release of their next major product, ASL*Accelerate/R2i for the Oracle E-Business Suite 11i.

ASL*Accelerate enables the non-technical to enhance, personalise and streamline their applications in ways that make end-users more efficient and productive, this can ultimately streamline the business and help companies make better use of their investment in the Oracle E-Business Suite.

Craig O'Neill, founder of ApplTop Solutions says "We originally developed a prototype of ASL*Accelerate during the early part of 1999; since that time we have released ASL*Form and have also been working hard to ensure that ASL*Accelerate is as flexible and as powerful as possible. It meets all of our expectations as far as ease of use and functionality are concerned. Almost all businesses that use the Oracle E-Business Suite can benefit greatly by using ASL*Accelerate, whether they want to simply make some existing forms more secure by dynamically hiding fields or whether they want to develop a range of custom navigational enhancements to the system then ASL*Accelerate provides them with the tools they need at a very low cost. Cost, implementation times and risk no longer factor into the equation when deciding whether or not to provide an end user with what they require."

The product consists of a number of components that allow its users to enhance existing parts of the Oracle E-Business Suite in a matter of minutes without having to write a single line of code. The two main components are: -

ASL*Zoom...

Create navigational enhancements to the applications.

ASL*Action...

Make amendments to existing forms within the applications.

ASL*Accelerate offers low cost, low risk solutions for everyday issues that do not require strong technical skills and that can be provided in a matter of minutes.

AppITop Solutions say, "Since before the release of our flagship product ASL*Form, we have been working hard on ASL*Accelerate, we are pleased to announce its release and we are confident that it will meet and exceed all of our clients expectations. ASL*Accelerate is a very powerful and flexible product that can help improve the end-users experience of the Oracle E-Business Suite in so many ways that it facilitates greater productivity and acceptance of a system."

ASL*Accelerate will initially only be available for Oracle E-Business Suite 11i but a version for Oracle Applications 11.0.x will be made available shortly after the products initial release.

ASL*Accelerate is priced at £9,500 (GBP) per site. A single site license entitles you to install the product on as many Applications instances as is required so long as they all reside at a single site. There are no restrictions on the number of users, either developer or end-user. AppITop Solutions also provide comprehensive support services, consultancy and training.

Full product details including licensing/pricing are available from AppITop Solutions website.

All AppITop products are available on a zero cost, zero obligation trial basis for up to 4 weeks. AppITop Solutions state that ROI is very likely to be realised during the trial period.

For more information, to arrange an online live product demonstration or a no obligation product trial then contact AppITop Solutions with your requirements.
